

Education

Einstein College of Engineering <i>B.E., Computer Science and Engineering (CGPA: 7.26)</i>	Tirunelveli, India 2020 - 2024
M.D.T Hindu college Hr. Sec. School <i>Higher Secondary School Certificate (Score: 63%)</i>	Tirunelveli, India 2020
M.D.T Hindu college Hr. Sec. School <i>Secondary School Leaving Certificate (Score: 89%)</i>	Tirunelveli, India 2018

Programming Skills

Frameworks: React.js
Languages: JavaScript, Python
Databases: MySQL, PostgreSQL, MongoDB
Operating Systems: Windows, macOS, Linux
Version Control Systems: Git

Work Experience

Intwhizz Business Solutions <i>Junior Software Developer</i>	Tirunelveli, India Aug 2025 - Feb 2026
– Point of Sale system - Developed a responsive POS application to manage billing, sales transactions, inventory tracking, and customer management for business operations. Integrated dynamic dashboards, real-time data handling, and REST APIs to improve operational efficiency and user experience. – Contributed as a Frontend Developer in the development of POS (Point of Sale) systems and enterprise web-based applications. – Developed and maintained scalable, responsive, and user-centric web applications using React.js, JavaScript, HTML5, CSS3, Tailwind CSS. – Worked collaboratively using Git and GitHub for version control, code management, branch handling, pull requests, and team collaboration.	
Sentinix Tech Solutions <i>Junior Software Developer</i>	Tirunelveli, India Feb 2025 - July 2025
– Temple Management System - Developed a web-based temple management system to streamline daily administrative activities such as pooja booking, donation management, devotee records, event scheduling, and reporting. – Managed API communication and handled Create, Read, Update, and Delete (CRUD) functionalities using Axios. – Assisted in improving application usability and streamlining temple administrative workflows through digital solutions. – Maintained project repositories using Git and participated in collaborative development workflows.	

- **Backup & Restoration WordPress plugin** - Worked as a Frontend Developer on the Backup & Restoration WordPress Plugin, which enables users to securely back up website data and efficiently restore it when needed.
- Focused on developing responsive, scalable, and user-friendly interfaces using React.js, JavaScript, HTML5, CSS3, and MUI.
- Contributed to building interactive UI components, configuration panels, and dynamic forms to simplify backup scheduling, data management, and restoration workflows.
- Collaborated closely with backend developers and QA teams to integrate frontend functionalities with core plugin operations, ensuring seamless performance and reliability.

Projects

MultiModal RAG

- Developed and enhanced an AI-powered application featuring voice interaction and image rendering capabilities to improve user engagement and overall user experience.
- Implemented semantic search and intelligent response generation using Sentence Transformers for text embeddings and FAISS as the vector database for efficient similarity search and retrieval.
- Integrated Google Gemini ADK for AI-driven response generation and conversational functionality within the application.
- Designed and managed document embedding workflows, vector storage, and retrieval pipelines for optimized information processing.
- Worked on integrating multimodal features including text, voice, and image-based interactions to create a more interactive AI experience.
- Collaborated on system architecture, API integration, and performance optimization for scalable AI application development.
- Explored and implemented emerging AI technologies and frameworks to continuously improve application capabilities and user interaction experiences.

Achievements

Certification of Completion in Frontend Development (React.js)

Issued by Smackcoders Technologies Inc – Jan 2025

Languages Known

- Tamizh (Native Proficiency)
- English (Professional Proficiency)
